

Araucariaceae

AGATHIS Salisb.

Dammara Link, *nom. illeg.*

See Mabberley, *Telopea* 9(4): 743-754 (2002) for a detailed discussion of synonymy and typification of Australasian *Agathis* species.

Agathis atropurpurea B.Hyland

Qld

Agathis microstachya J.F.Bailey & C.T.White

Qld

Agathis robusta (C.Moore ex F.Muell.) F.M.Bailey

Dammara robusta C.Moore ex F.Muell.

Dammara palmerstonii F.Muell.

Dammara palmerstoni F.Muell., *orth. var.*

Agathis palmerstonii F.M.Bailey

Agathis palmerstoni F.M.Bailey, *orth. var.*

Dammara bidwillii Guilfoyle, *nom. superfl.*

Dammara bidwilli Guilfoyle, *orth. var.*

Dammara sp. (Wide Bay) sensu Macarthur, *Cat. Pl. Cult. Camden* 1850: 10 (1850); Moore, *Ann. Rep.* 1853: 3 (1853)

Dammara sp. The Kaurie Tree of Wide Bay sensu Moore in NSW Exhibition Commissioners, *Cat. Nat. Ind. Prod. NSW*: 36 (1855)

Dammara sp. Le 'Kaurie Tree' de Wide Bay, Moore in Macarthur & Moore, *Cat. Coll. Bois Indig.*: 22 (1853)

Dammara sp. New Holland sensu C.Moore, *Ann. Rep.* 1855: 4-6 (1855)

Dammara brownii auct. non Hort. Angl. ex Lem.: W.Hill, in Anon., *Cat. Nat. Ind. Prod. Qld.* 15 (1862)

Agathis brownii auct. non (Lem.) L. Bailey, *Cult. Conif. N. Am.* 151 (1933)

Australian plants are all referred to subsp. *robusta*, but subspecies rank is usually not used in this species in Australia. *A. robusta* subsp. *nesophila* Whitmore occurs in New Guinea and New Britain. The name "*Dammara robusta* C.Moore ex Parl." listed by Chapman, APNI 901 (1991) is an isonym, a mere later usage of Mueller's name, not a later homonym.

Araucaria cunninghamii f. *glauca* (Antoine) F.M.Bailey

Araucaria cunninghamii Aiton ex A.Cunn. f. *cunninghamii*

Araucaria cunninghamii var. *longifolia* Endl.

?*Altingia cunninghamii* G.Don, *nom. inval.*, *nom. nud.*

The name *Altingia cunninghamii* G.Don was published as a *nom. nud.* in J.C.Loudon, Hort. Brit. 408 (1830). The same name was shortly thereafter used by J.Ross, Hobart Town Almanack 66 (1835) in referring to a tree collected by R.Gunn at Meander and by J.W.Scott on the Huon River in Tasmania. Hill (1998) referred *A. cunninghamii* to the synonymy of *Araucaria cunninghamii*, but if the two references refer to the same plant, this cannot be correct. The Tasmanian plants of Ross (1835) were probably *Athrotaxis selaginoides* (A.Buchanan, pers. comm.). Certainly, there is no *Araucaria* in Tasmania. Alternatively, the J.Ross name may be a misapplication of the G.Don *nom. nud.*

The name "*Araucaria cunninghamii* Sweet ex Courtois" listed by Chapman, APNI 250 (1991) is only an indirect reference to Sweet's Hort. Brit (1830) *nom. nud.*, not an attempt to coin a later homonym.

ARAUCARIACEAE EXCLUDED NAMES

Araucaria van-geertii Hort.

Described from a cultivated plant "from Australia". Type not known. Identity uncertain.

Dammara nigra Rumph.

This is *Canarium acutifolium* (DC.) Merr. var. *acutifolium* (Burseraeae).
